

The background of the entire page is a faded, semi-transparent image of the United States flag, showing the stars and stripes. The text is overlaid on this background.

My name is Michael Holley, and I am one of the EMS Instructors at Central Ohio EMS Training. I have only been a certified EMS Instructor for one year, but am not new to teaching EMS providers. I am a Paramedic, EMS Instructor, 240 Firefighter, Tactical Combat Casualty Care instructor, Tactical Emergency Casualty Care instructor, Advanced Medical Life Support instructor, Pre-Hospital Trauma Life Support instructor, a Geriatric for EMS instructor, and have 18 years of experience in emergency medicine. I work full time for an ambulance district in northwestern Knox county as well as part time for a fire department in southern Richland county. During my career, I have worked in various areas of EMS. I have worked in the public sector, private sector, event medical, and even amusement park EMS. I feel that these varied experiences have made me well rounded as a provider, and a knowledgeable educator. I find this to be a rewarding and challenging career. I am always searching for educational opportunities to better my patient care and training capabilities. In regards to this, I am currently working on my Bachelors of Science in Emergency Medical Care from Eastern Kentucky University.

I have been married for 14 years to my wonderful wife, she has been extremely supportive of my career and the long hours that come with it. My wife is a Paramedic as well, and is currently enrolled in a nursing program to further her career. She works full time in the Emergency room at a large Columbus area hospital. I have two children, a 13 year old daughter and an 11 year old son. They are fantastic kids and keep us busy with all of their extracurricular activities. We also have two pets, a dog named Maverick and a bunny named Mr. Hops. When we manage to find free time away from work and school, we enjoy traveling and going camping.

I enjoy educating EMT and Paramedic students. I believe that experiences during my career have made me a well rounded Instructor. I strive to make sure all students have a good solid foundation so they can be the best providers possible. My preferred part of class is lab time, I feel doing hands-on training is the best way a student can master the majority
